

# Problems to Watch for in Adults

Malocclusions, some of which are illustrated below, may be improved by orthodontic treatment.

Final treatment decisions should be made in consultation with the family dentist, the orthodontist and other specialists, if necessary.

Anterior Crossbite

Spacing

Crowding

Open Bite

Protrusion

Impacted/Tipped/Missing Teeth

Periodontal Problems

Tooth Wear/Bruxism

Deep Bite

Class II

Vertical Problems

Class III
